

## SCALE FLEX

### INSTANCE-BASED CLOUD, ON DEMAND

ScaleFlex is an **instance-based**, hourly billed, cloud computing service which provides users the ability to spin up a variety of pre-established and variable capacity cloud instances on demand.

The ScaleFlex cloud platform is ideally suited to support test and development projects, on-demand compute needs, or budget-conscious hosting requirements.

Support new initiatives and application development, or enable rapidly-changing IT projects with on-demand and usage-billed ScaleFlex cloud hosting services. Choose from a variety of virtual machine and **OS blueprints**, or select a **flexprint profile** which allows for customization of compute and RAM resources as needed. Once deployed, VMs boot quickly and are presented with attached storage resources. ScaleFlex deployments include 1500GB of bandwidth and make an ideal and cost effective hosting platform for any business.

**BOOTS IN MINUTES    SIMPLE TO MANAGE    IDEAL FOR TEST & DEVELOPMENT    HOURLY BILLING    COST EFFECTIVE**

Choose from common blueprints or use a flexprint profile to customize compute and RAM resources on demand.
